

Hacienda Heights Community Plan Update
Summary of Changes to Revised Draft Materials Since August 25, 2010
Updated September 8, 2010

The **Updated Revised Draft Community Plan** contains the following changes based on feedback received since August 25, 2010:

Topic	Draft Plan Reference	Issue	Changes in Revised Draft
Land Use Amendments	N/A	A resident requested after the community hearing that information about future amendments be added to the Plan.	Added the information in the Land Use chapter.
Parks and Open Space	Goals and Policies	A resident requested in a letter that park planning include specific proposals and targets.	Added a policy in Land Use.
Conservation	Goals and Policies, Implementation	Puente Hills Landfill Native Habitat Preservation Authority commented that overall the proposed Plan is very commendable, and provided specific comments regarding concerns or areas in need of clarification.	Made all recommended edits to goals, policies, implementation actions and map.
Fuel Modification	Goals and Policies	A resident requested in an email that fire hazards throughout the community, especially in high fire severity zones, be proactively managed.	Revised a fuel modification policy in Public Health and Safety.
Climate Action Planning	N/A	Climate Action Plans and greenhouse gas reductions are a priority at the county and state levels and should be explicitly discussed in the Plan.	Added a goal and several policies to Conservation.
Public Safety	N/A	Sheriff commented that law enforcement assets should increase in the future if population, traffic or density measures increase.	Added a law-enforcement goal and policy in Public Health and Safety.

The **Updated Revised Draft Initial Study and Mitigated Negative Declaration** contains the following change based on feedback received since August 25, 2010:

Topic	Draft Initial Study Reference	Issue	Changes in Revised Draft
Resources	Biota	Puente Hills Landfill Native Habitat Preservation Authority provided additional information and reference re: sensitive habitats and species.	Revised the discussion to incorporate suggestions.
Services	Fire/Sheriff	Sheriff commented that while current law enforcement needs in the community are at a sustainable level and have not increased in over 30 years, any amount of growth would have a direct impact on current response times as well as current proactive law enforcement practices. The Station made recommendations for addressing future law enforcement needs.	Changed the conclusion to Less Than Significant With Project Mitigation and added a mitigation measure.
Services	Fire/Sheriff	Fire provided one corrections and reminders that future development projects must comply with applicable codes. Indication additional areas that should be addressed in future development reviews.	Added a mitigation measure.
Environmental Safety	Other Factors	DPW commented that underground storage tanks, industrial waste treatment and disposal facilities must be reviewed by Environmental Programs.	Added information to the discussion.
